SUMMARY

I am a dedicated Full-Stack Developer with expertise in designing and implementing innovative projects. My experience includes developing an IoT-based inventory management system and user-friendly dashboards. I excel in integrating modern frameworks such as React.js and Django, thereby enhancing user experiences and operational efficiencies. My focus on performance optimization and collaboration drives project success

EXPERIENCE

Role: Software Developer(Nexage Technology)

Project: Smart kitting System

02/2024 - Present Pantnagar

An IoT-based pick-to-light system to enhance inventory management and operational efficiency.

- Built and deployed the entire IoT-based pick-to-light system, boosting inventory efficiency by 15%
- Integrated RESTful APIs, reducing response times by 20%
- Designed scalable web applications using microservices, Django, Celery, Redis, and React.js

Role : Software Developer (Nexage technology)

Project : Central Linked server System

02/2024 - Present Pantnagar

A collaborative project delivering data solutions for Tata Motors

- Consolidated data access for 30+ machines, enhancing tracking and operational efficiency
- Developed a user-friendly dashboard with dynamic updates using AJAX
- Optimized database queries, achieving a 30% reduction in execution time

EDUCATION

Master of Computer Applications (MCA)

Chandigarh University

08/2020 - 05/2023 Mohali, Punjab

Bachelor of Science (Computer Science)

Kumaon University

08/2017 - 05/2020 Nainital, Uttarakhand

KEY ACHIEVEMENTS

E-commerce and Job Portal Development

Successfully developed and deployed a full-stack e-commerce platform and a job portal, enhancing online business capabilities

Tailwind

Node.js

Microservices

MySQL

Docker

PROJECTS

Full-Stack E-commerce Application

01/2022 - 05/2022

A full-stack e-commerce application supporting online transactions and product management

- Built a robust E-commerce platform with secure Razorpay payment integration
- Leveraged React.js, Redux, and Tailwind CSS for an intuitive user experience
- Integrated Firebase for real-time database management and authentication

Online Job Portal

06/2022 - 12/2022

A platform for job seekers and employers to connect and streamline the hiring process

- Developed a job portal for efficient job posting and application tracking
- Utilized Python and Django for back-end development with SQLite for data storage
